EXPERIENCE

Senior Teacher, Curriculum Developer

CodeWizardsHQ 2017-2022

Designed and developed new level 2 Responsive Web Development course. Assisted in the development of new courses in API based games and Bootstrap. Taught live, online coding classes for middle to high school aged children. Positive, encouraging, and personalized instructional approach improved student retention. Retained cohorts and private students throughout three year curriculum. Subjects included: Python, HTML, CSS, Javascript, SQL, APIs, OOP, ORM, MVC.

Owner, Likely Arts Web + Print

2005-present

Provided web development and graphic design services to clients ranging from individuals to corporations. Retained major clients over a decade. Specialty: clean, original, responsive design with a focus on usability. Primary services: front-end web development, coding in HTML, CSS, Javascript and JS libraries; original theme development for PHP based content management systems including Wordpress and Concrete5. Other services: social media management, custom email campaigns, content creation and editing, branding, print advertising, book design. Original site design featured on HTML5 Gallery, 2012. Online portfolio: LikelyArts.com.
